

**FENTANYL KILLS. HERE'S HOW YOU CAN STAY ALIVE!**

● Help each other.  
Don't use alone—pair up.

● Fentanyl kills quickly. Make sure you  
and your friends carry naloxone.

● Fentanyl comes in pills, pure powders, and powder mixed with  
other drugs, especially heroin and cocaine. You can't see it,  
smell it, or taste it. Whatever you do, start low, and go slow.

● If you think it's an overdose, **call 911**. Every minute counts.

Call **942-STOP**  
(942-7867)  
to get connected to  
treatment and  
recovery services.
