“I've always been drawn to prevention work because it is a space that focuses on opportunity, hope, and creativity. A comprehensive public health approach to prevention can reduce and eliminate disparities in health and lead to better health outcomes for all.

As the prevention landscape evolves, the RIPRC plans to focus on health disparities and equity and increase project development strategies for prevention providers. We are fortunate to have strong community partnerships and are excited about the next PREVCON 2024!”

**SHANNON SPURLOCK**  
DIRECTOR, RIPRC
