**HAVE USED**  
**MARIJUANA**

(2019 NATIONAL YOUTH RISK BEHAVIOR SURVEY)

**THC**—marijuana’s hallucinogen—now comes highly concentrated. Some youth use this very potent and dangerous form:

- In edible products
- In ENDS (*End Nicotine Delivery Systems, aka e-cigarettes, vaping*)— Over 50% of high school youth have used ENDS.
- By **dabbing** a waxy substance onto the coil of an ENDS or bong

## **YOU CAN HELP! #itsourfuture**

- ➔ Support policies and laws that protect our youth
- ➔ Model your own healthy habits for the youth in your life
- ➔ Talk to youth about the dangers of marijuana, especially potent THC extracts being used in ENDS and edibles
